**Tunable Notch Filters**

6367 Single Cavity

Tunable Notch Filters

6367 Series

Model 6367 is easily tuned through its full frequency range. A second control allows adjusting the 3 dB bandwidth over a wide range. The adjustable bandwidth feature of these filters allows suppression of an unwanted carrier with minimum impact on adjacent, desired frequencies.

**Cascade It For A Deeper Notch**

For spot frequency applications, two or three identical units may be cascaded to produce a notch twice or three times as deep with the same 3 dB bandwidth. Be sure to complete the model number by inserting the desired bandwidth.

**With 3 dB bandwidth adjusted to 3 MHz**

**Mechanical Specifications:**

Baseplate Dimensions: 2” x 2” (for single cavity)

Rack Mount Available Upon Request

**Connectors:** Standard: 75 ohm-Type F or 50 ohm-BNC
.Optional: 50 ohm-SMA or 50 ohm-Type N

**Ordering Information:**

(X)(Y)6367-(Fo)/(BW3)

(X) - designates the connector type

**Connectors:** 50 ohm - BNC (B)
.SM (S)
.Type N (N)
.75 ohm - Type F (F)

(Y) - designates number of cavities

**Cavities:**
.(S) Single
.(D) Double
.(T) Triple

(Fo) - designates the notch frequency (MHz)

(BW3) - designates the 3 dB bandwidth (MHz)

**Note:** Orders for double and triple cavity 6367’s must specify notch frequency and 3 dB bandwidth.
