January 1, 2006

Dear Customer,

RE: RoHS per the European Community Directive 2002/95/EC

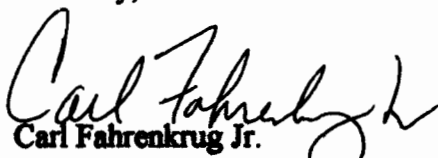

Microwave Filter products are available in compliance to 2002/95/EC RoHS directive. Many products have always been in compliance to the RoHS directive. Others have been redesigned to meet these requirements. As a result, a few products may have different part numbers for RoHS and lead free products. Please consult the factory.

RoHS compliant product and/or lead free product must be notated on any purchase orders to ensure supply of the proper part.

MFC labels all parts or product containers with a symbol that indicates that the product is RoHS.

If any further information is required, please contact us at 1-800-448-1666.

Sincerely,

  
Carl Fahrenkrug Jr.  
Director of Manufacturing
